Syafaat Akbar

7+ years of experience | Jakarta, Indonesia | +62 822-8300-5353 | syafaatakbarrr@gmail.com | linkedin.com/in/syafaatakbar

PROFILE

IT professional with a bachelor's degree in informatics engineering and 7+ years of experience in Software Quality Assurance, IT Business Analysis, and Business Process Improvement. Experienced in analyzing business requirements, modeling and optimizing business processes, supporting digital transformation initiatives, and delivering technology solutions aligned with organizational objectives. Skilled in BPMN process modeling, process improvement, automation initiatives, application testing, and cross-functional stakeholder collaboration. Passionate about leveraging technology innovation and continuous improvement practices to drive measurable business impact.

EDUCATION

Nusa Mandiri University — **Jakarta, Indonesia**
Informatics Engineering / bachelor's degree, S-1 — *2015-2019*
GPA: 3.81/4.00

WORK EXPERIENCE

BINUS (Bina Nusantara Group) — **Jakarta, Indonesia**
IT Business Process Improvement Officer — *2022-Present*

Key Responsibilities

- Analyze, model, and optimize end-to-end business processes to improve operational efficiency, service quality, and alignment with organizational objectives.
- Gather, analyze, and document business requirements, including application enhancement requests, while assessing their impact on existing business processes and systems.
- Collaborate with business stakeholders and cross-functional IT teams to identify process improvement opportunities and recommend technology-driven solutions aligned with business needs.
- Develop and maintain business process documentation, SOPs, process flowcharts, and BPMN 2.0 models using **Bizagi Modeler**, while utilizing **MIRO** and **Looker Studio** for process collaboration, visualization, documentation, and reporting to ensure standardized and continuously updated business practices.
- Facilitate business process discovery workshops, stakeholder interviews, and requirement gathering sessions with business users and management teams to define current-state and future-state processes.
- Manage and monitor business process changes throughout the project lifecycle, ensuring alignment with governance standards, business objectives, and implementation requirements.
- Evaluate application effectiveness, business benefits, and user adoption by analyzing solution impact, user feedback, and improvement opportunities to maximize technology value.
- Identify and recommend process improvement initiatives through process redesign, automation opportunities, and digital solutions to reduce operational effort, processing time, and business costs.
- Support enterprise digital transformation initiatives by translating business challenges into strategic improvement opportunities, business use cases, and implementation roadmaps.
- Develop business value narratives, executive presentations, and AI success stories for digital transformation initiatives, including international technology award submissions (**IDC Future Enterprise Awards, Gartner, CIO 100**) and Microsoft AI User Success Stories in collaboration with business, IT, and Corporate Marketing Communication teams.

Key Projects

AI-Powered Workforce Intelligence Platform (beelajar)

- Contributed to the documentation of business processes, business value, and measurable project outcomes for BINUS University's AI-powered workforce intelligence platform.
- Developed executive business narratives, business value propositions, impact analyses, and business impact documentation for international technology award submissions, including **IDC Future Enterprise Awards, Gartner, and CIO 100**.
- Collaborated with business stakeholders, solution architects, and IT teams to validate project narratives, business impact, and transformation outcomes for international award submissions.

AI Student Achievement Summary Platform

- Contributed to the documentation of business processes, business value, and measurable project outcomes for the AI-powered student achievement summary solution.
- Developed executive business narratives, business value analyses, and award submission materials for international technology award submissions, including **IDC Future Enterprise Awards, Gartner, and CIO 100**.
- Collaborated with business stakeholders, solution architects, and IT teams to validate business narratives, project achievements, and measurable outcomes prior to award submissions.
- Prepared Microsoft AI User Success Story materials in collaboration with IT teams and Corporate Marketing Communication, highlighting operational efficiency, responsible AI adoption, and digital transformation.

AI Forum Summary for Learning Management System

- Contributed to the documentation of business processes, business value, and measurable project outcomes for the AI-powered forum summarization solution within BINUSMAYA.
- Developed executive business narratives, business value analyses, and executive presentation materials for international technology award

submissions, including **IDC Future Enterprise Awards, Gartner, and CIO 100**.

- Collaborated with business stakeholders, solution architects, and IT teams to validate business narratives, project achievements, and measurable outcomes prior to award submissions.
- Prepared Microsoft AI User Success Story materials in collaboration with IT teams and Corporate Marketing Communication, highlighting lecturer productivity improvements, Generative AI adoption, and enhanced learning experiences.

AI Career Growth Recommendation Platform

- Contributed to the documentation of business processes, business value, and measurable project outcomes for the AI-powered career growth recommendation platform.
- Developed executive business narratives, business value analyses, and business value analysis for international technology award submissions, including **IDC Future Enterprise Awards, Gartner, and CIO 100**.
- Collaborated with business stakeholders, solution architects, and IT teams to validate business narratives, project achievements, and measurable outcomes prior to award submissions.
- Prepared Microsoft AI User Success Story materials in collaboration with IT teams and Corporate Marketing Communication, highlighting AI-driven talent development, personalized learning, and workforce transformation.

Digital Transformation Initiative – BINUS Schools Education (BSE)

- Participated in enterprise-wide digital transformation planning using the North Star Framework.
- Conducted business discovery workshops and stakeholder interviews with the Board of Management (BOM), Board of Directors (BOD), Principals, Vice Principals, Teachers, and General Operations teams.
- Identified strategic priorities, business pain points, and digital opportunities, translating them into future-state business capabilities, digital use cases, and implementation roadmaps.
- Supported the development of enterprise transformation initiatives aimed at improving educational operations and service excellence.

Business Process Dashboard Analytics Development

- Designed and developed business process analytics dashboards to provide visibility into process performance, operational insights, and data-driven improvement opportunities.
- Built reporting dashboards using Looker Studio to monitor business process performance and support continuous improvement initiatives.

Mandiri Utama Finance **Jakarta, Indonesia**
Business Analyst *2021-2022*

Key Responsibilities

- Analyze existing business processes and identify improvement opportunities to enhance operational efficiency and align solutions with business objectives.
- Gather, analyze, and document business requirements from users, translating business needs into Business Requirement Documents (BRD), Change Requests (CR), functional specifications, and supporting documentation.
- Design and document future-state business process flows and frameworks while ensuring alignment with existing business processes and system capabilities.
- Collaborate with business stakeholders, developers, testers, and project teams to clarify requirements, resolve business and design issues, and ensure successful solution delivery.
- Developed BRD documentation and support requirement validation throughout the project lifecycle.
- Conduct User Acceptance Testing (UAT) and business verification activities to validate system functionality, usability, and alignment with user expectations.
- Collaborate with internal teams, development teams, and software testing teams to ensure successful implementation and delivery of IT solutions.
- Monitor project progress, milestones, and deliverables in collaboration with Project Management teams to support successful project completion.
- Provide regular project status reports and updates regarding requirement development, implementation progress, and project deliverables.

Key Projects

Business Process Reengineering – Account Acquisition (ACQ) System

- Contributed to business process analysis and requirements documentation for the Account Acquisition System improvement initiative.
- Developed Business Requirement Documents (BRD) by analyzing existing processes, identifying improvement opportunities, and defining future-state process requirements and system enhancement needs.
- Collaborated with business users and development teams to ensure the proposed solution aligned with operational needs and business objectives.

SLIK Calculation Adjustment – Collection Management System (CMS)

- Supported the enhancement of the Collection Management System by analyzing business requirements related to SLIK calculation adjustments.
- Prepared BRD documentation and translated business requirements into functional requirements for system development.
- Coordinated with business stakeholders, developers, and testing teams to validate requirements and support implementation readiness.

Installment Date Rescheduling Enhancement – Account Management (AM) System

- Analyzed business requirements for installment date rescheduling functionality within the Account Management System.
- Developed requirement documentation and business process flows to support system enhancement implementation.

- Collaborated with cross-functional teams to ensure system changes aligned with business processes and user expectations.

Auction Report & Request Enhancement – Customer Information System (CIS)

- Supported business analysis activities for system integration between MONA and Customer Information System (CIS), including requirement analysis, process mapping, and integration documentation.
- Prepared BRD documentation, process flow analysis, and requirement specifications to support application enhancement.
- Conducted requirement validation with stakeholders and supported testing activities to ensure solution effectiveness.

MONA Integration with Customer Information System (CIS)

- Contributed to business analysis activities for system integration between MONA and Customer Information System (CIS).
- Documented integration requirements, business processes, and expected system interactions through BRD and supporting documentation.
- Collaborated with business stakeholders, development teams, and testing teams to support successful integration implementation.

Exa Mitra Solusi (Client: BCA Finance) **Jakarta, Indonesia**

Software Quality Assurance *2019-2021*

Key Responsibilities

- Executed functional, regression, integration, and User Acceptance Testing (UAT) for web and mobile applications to ensure system quality, stability, and compliance with business requirements.
- Executed manual test scenarios, test cases, and validation activities based on functional specifications and business requirements.
- Identified, documented, and tracked software defects, collaborating with development and Business Analyst teams to resolve issues and improve application quality.
- Performed bug verification, regression testing, and application validation throughout the software development lifecycle (SDLC).
- Utilized Trello to monitor project progress, manage testing activities, and track issue resolution throughout project delivery.
- Prepared UAT reports, defect summaries, and testing documentation, presenting testing outcomes and recommendations to Business Analyst and project stakeholders.
- Supported automation testing initiatives using Katalon Studio and UiPath to improve testing efficiency and validate application functionality.
- Collaborated with Business Analysts, developers, and project teams to ensure software solutions met business requirements and quality standards.

Key Projects

KKBSK Application – BCA Finance (Financore)

- Executed manual functional testing, positive and negative test scenarios, and User Acceptance Testing (UAT) to validate application functionality and business requirements.
- Identified, documented, and tracked software defects through detailed bug testing, ensuring issues were resolved prior to production deployment.
- Collaborated with Business Analysts and development teams to validate bug fixes, perform regression testing, and improve overall application quality.

Customer Virtual Account Application – BCA Finance (Financore)

- Performed end-to-end manual testing for new features and system enhancements using predefined test scenarios and business requirements.
- Executed positive, negative, and regression testing to ensure application reliability and transaction accuracy.
- Documented testing results, defect reports, and validation outcomes to support successful project implementation.

Autodebit Application – BCA Finance (Financore)

- Conducted functional and User Acceptance Testing (UAT) for autodebit process enhancements to ensure compliance with business requirements.
- Performed exploratory testing to identify unexpected defects beyond predefined test scenarios.
- Worked closely with Business Analysts and developers to verify issue resolution and validate application functionality.

Installment Restructuring System

- Executed comprehensive manual testing for installment restructuring functionalities, including positive, negative, and boundary test scenarios.
- Validated business rules and system calculations to ensure accurate implementation of business requirements.
- Reported defects and supported regression testing throughout the software development lifecycle.

Data Collection System

- Executed end-to-end testing activities for the Data Collection System, validating business workflows, data accuracy, and system integration across multiple testing cycles.
- Verified application workflows, business logic, and data accuracy through structured test execution.
- Collaborated with cross-functional teams to ensure application quality prior to production release.

FINA Application

- Executed comprehensive manual testing for the FINA Application, including functional validation, exploratory testing, and business process verification to ensure application readiness for production.
- Identified software defects through structured test execution and exploratory testing beyond predefined scenarios.

- Supported application release activities by validating bug fixes, preparing testing documentation, and providing quality assurance recommendations.

Certifications & Professional Development

Artificial Intelligence & Microsoft Technologies

- **Optimizing Creativity with Microsoft Copilot** — BINUS Learning / Microsoft Partner | **2026**
- **What's New in Generative AI: Driving Operational Efficiency** — BINUS Learning | **2026**
- **Navigating Future AI: Technical Foundation and Human Oversight** — BINUS Learning | **2026**
- **Artificial Intelligence (AI) for Administrative** — BINUS Learning | **2025**
- **AI-Powered Forecasting & Solutions** — BINUS Learning | **2024**

Business Analysis & Digital Transformation

- **Certified Strategic Business Analyst (CSBA)** — PT Eltasa Prima Konsulta | **2024**
- **IT Business Process Analysis** — BINUS Learning | **2025**
- **Strategic Business Project Essentials** — BINUS Learning | **2025**

Business Process Management & BPMN

- **Communicating Business Processes in IT Projects** — BINUS Learning | **2023**
- **The Practical BPMN 2.0** — BINUS Learning | **2023**
- **BPMN 2.0 for Business Analyst** — BINUS Learning | **2023**

SKILLS

Soft Skills:

Adaptability, Effective Communication, Collaboration & Teamwork, Leadership, Problem Solving, Creativity, Initiative, Discipline, Professional Ethics, Public Speaking, Continuous Learning, and Time Management.

Technical Skills:

Business Analysis & Process Improvement:

Business Process Analysis, Business Process Improvement, Business Requirement Analysis, Digital Transformation Analysis, SOP Documentation, Process Modeling, and User Experience (UX) Analysis.

Process Modeling & Analysis Tools:

Bizagi Modeler (BPMN 2.0), UML, MIRO.

Data & Automation Tools:

Looker Studio (Google Data Studio), Microsoft Power Automate, UiPath RPA.

Productivity & Project Tools:

Microsoft Office Suite, Google Spreadsheet, Application Testing & Implementation, User Acceptance Testing (UAT).
